

## PRESS RELEASE

### **AL-KO Vehicle Technology at the CMT 25: comprehensive comfort, proven safety and stylish lighting**

**AL-KO Vehicle Technology will be presenting a full range of leisure vehicles and accessories at the CMT in Stuttgart in Hall 7 / C12 and in the Foyer's East Entrance / EO 126.**

With the [PROSAFE wheel clamp for caravans](#), the company offers professional anti-theft protection. Designed for a wide range of caravans, it fits 13- to 17-inch wheels with standard steel or aluminum rims. A mixture of hard-wearing materials forms a multi-layer structure to make the clamp tremendously robust.

Hydraulic levelling systems from AL-KO and E&P keep the leisure vehicle safe and stable at all times, even on difficult surfaces. HY4 as well as LevelIC, LevelIM, LevelIM Pro and LevelVan are easy to operate at the touch of a button. [LevelVan for panel vans](#) also allows more payload as its innovative carbon-aluminum-steel mix significantly reduces weight. The [weighing function for LevelIM Pro for motorhomes](#), now optionally available, provides information about the actual gross weight of your vehicle at the touch of a button.

The semi-active chassis control [COMFORT DRIVE for motorhomes](#) automatically adapts to the road surface, reacts automatically to manoeuvres such as braking, accelerating or cornering, and compensates for potholes and bumps with ease by automatically adjusting the shock absorbers. COMFORT DRIVE offers a particularly pleasant and effortless driving experience on long journeys.

[SAWIKO](#), the specialist in carrier systems and towbars, has the right solution for every requirement when it comes to safely transporting bicycles, e-bikes and scooters in comfort. Developed for discerning campers, the new VELO, VARIO and LIGERO models offer numerous advantages for enjoyable travel. They impress with their slim, contemporary design. The black-coated elements are not only practical but also aesthetically pleasing. The new VARIO LED and LIGERO LED product variants also feature stylish LED lighting to make the carrier even more visible to vehicles behind you.
