Kötz. Cycling is more popular than ever. Even when holidaying with a van, the bike is a must for many people. Rear carrier systems such as the new, improved AGITO VAN 2.0 from SAWIKO offer safe and convenient transport on leisure vehicles. The rear carrier from the AL-KO subsidiary is now available throughout Europe and is a practical and stable solution for Ford Westfalia Nugget, Ford Tourneo Custom and Fiat Ducato.

With a payload of 60 kilograms, the AGITO VAN 2.0 easily transports two bicycles or e-bikes. The new model impresses with a particularly user-friendly design. As with the previous model, access to the rear doors is always possible thanks to the pivot function. It's even easily possible when loaded. When the bike carrier is not in use, the transport platform can be folded upwards to save space. This allows the carrier to remain on the vehicle without getting in the way of manoeuvres. Should disassembly nevertheless be required, this can be done quickly and completely without tools.

Need more storage space? With the conversion kit for a transport box, the AGITO VAN 2.0 can be easily transformed into a practical storage space extension. A towing hitch can also be easily retrofitted to the base crossbar.

The AGITO Van and matching accessories are available now from specialist dealers and all AL-KO customer centres.
