THE REVOLUTION FROM E&P LevelM Pro

THE NEW HYDRAULIC LEVELLING SYSTEMS
FOR MOTORHOMES

LevelM Pro FOR MOTORHOMES

THE NEXT-GENERATION HYDRAULIC LEVELLING SYSTEM

The LevelM Pro system levels the motorhome into a horizontal position intelligently and fully automatically. Thanks to its sophisticated mix of materials, the LevelM Pro hydraulic levelling system is significantly lighter than comparable systems. The intelligent electronic controls from E&P are mounted centrally, outside the vehicle, in a robust box that protects them from various weather conditions and environmental influences.

Discover the reliable technology from levelling experts E&P now!

ULTRA-LIGHT WEIGHT

- | Weight from 56 kg, thanks to the clever material mix of aluminium and steel
- | LevelM Pro offers the ideal combination of light weight and maximum stability
- | This means more payload possible

PRECISE, SMOOTH & QUIET LEVELLING

- | Optimum levelling accuracy and precision thanks to two independent pumps and brushless motors
- | Torsion-free, even levelling minimises the load on the chassis
- | Quality and reliability from the levelling expert

MAXIMUM COMFORT & FLEXIBILITY

In addition to the automatic levelling, two further positions, such as a tank-emptying position and a sleeping position, can be individually saved and automatically controlled.

ALWAYS UP TO DATE

Software updates and additional product features can be downloaded easily online without needing to visit a workshop.

LEVELM PRO advantages

- Horizontal in a few minutes
- Steady and secure positioning
- Fully hydraulic
- Very low noise level
- Minimal load on the chassis
