LevelM Pro 4x4: Maximum ground clearance and the utmost comfort for off-road campers

AL-KO Vehicle Technology is expanding its product portfolio with the LevelM Pro 4x4 – a hydraulic levelling system designed – in close collaboration with campervan manufacturer Yucon – for demanding off-road applications. The innovative leveling system will be installed for the first time in the Yucon K-peak 4x4 off-roader. The official launch will take place at Caravan Salon 2025.

With [LevelM Pro 4x4](#), the company and its subsidiary [E&P Hydraulics](#) are introducing an off-road version of the proven LevelM Pro hydraulic levelling support system – custom-designed for the Mercedes-Benz Sprinter VS30 4x4 chassis.

At the core of this innovation are XXL cylinders, 100 mm longer than the standard model, delivering a ground clearance of 280 mm. This makes the LevelM Pro 4x4 perfect for adventure travelers, overlanders and nature campers who love to stray from the beaten path but don't want to compromise on comfort.

LevelM Pro 4x4 was designed to fully preserve the vehicle's off-road capabilities. Even challenging passages with steep inclines or uneven surfaces can be mastered without the system limiting mobility.

Levelling is fully automatic, quiet and smooth at the touch of a button. Two brushless AC motors and two independent pumps ensure maximum precision and smooth adjustment – with minimal stress on the chassis.

Thanks to its aluminum and steel material mix, LevelM Pro 4x4 is particularly lightweight, enabling a higher payload. Control is as intuitive as ever at the touch of a button – for reliable levelling on any ground. Currently, the system is exclusively available for Yucon camper vans based on the Mercedes-Benz Sprinters VS30 4x4 chassis.

Anyone wanting to experience the system live will have the opportunity to do so from August 29 to September 7 2025 at the Caravan Salon in Düsseldorf, at both the AL-KO Vehicle Technology and E&P Hydraulics stand (outdoor area 13-3) and in Hall 17 – directly at the stand of the Yucon K-peak off-roader.

LevelM Pro 4x4 opens up a new dimension of comfort for off-road travelers: More freedom thanks to 280 mm ground clearance, more safety thanks to precise and smooth levelling, and more payload thanks to its lightweight construction – all without compromising on off-road capability. Whether it's a secluded spot by the lake, a rocky mountain pass or a sandy coastal road, the system ensures stability and a restful night's sleep
